

CONFIRMATION Please bring with you and leave on dashboard

A SAFER HOME. A CLEANER STATE.

Thank you for making an appointment with Eco-Depot to properly dispose of your household hazardous waste. Prior to your appointment, please use the backside of this form to make a precise list of the household hazardous waste you are bringing to the Eco-Depot. For directions to your event visit <https://www.rirrc.org/eco-depot-appointment-download>. For additional information, please call 401-942-1430 ext. 241.

Use extreme caution when handling hazardous products

- Keep the products in their original containers. Be sure the containers are clearly labeled.
- Never mix hazardous materials. It is perfectly fine to bring half-empty containers. Because some chemicals are incompatible, mixing them could be very dangerous and harmful.
- Pack the materials in the trunk of your vehicle as far away from passengers as possible. Place crumpled newspaper between breakable containers to prevent accidental spills. Open a window in the vehicle and drive directly to Eco-Depot.
- Do not smoke while handling or transporting household hazardous waste.
- When you arrive at Resource Recovery, follow the signs to the Eco-Depot shed.
Remain in your vehicle. A trained worker will remove the HHW from your vehicle for you.

I certify that the waste I am disposing of is from a Rhode Island residence and is household generated, and not from any commercial or industrial source with the only exception of paint to be recycled under the PaintCare program.
